This semester, FGCU hosted the first international student from Nepal. Most people know Nepal as a country of great mountains to summit such as Everest, Kanchenjunga, Lhotse, and Mount Makalu. However, what most people don't know is that they have a wide variety of geography including the deepest canyon on Earth. The Kali Gandaki canyon is formed by the Kali Gandaki river located between the Himalayas. Nepal is the country with the greatest concentration of worldwide heritage by UNESCO.
