

We need your input!

Come tell us how travel to, and around, our campus may be improved during a **Transportation Forum!**

January 21, 2015 (1:30 pm to 3:00 pm)
Sugden Welcome Center, room 108

Florida Gulf Coast University is currently updating its Campus Master Plan, which outlines **FGCU's vision for growth over the next ten-year period**, and identifies goals, objectives and policies for achieving that vision!

A **public forum** is being conducted to get input from all stakeholders. This forum will focus on identifying near and long-term **opportunities for improving alternatives such as walking, bicycling and transit**. The improvements will enhance travel on and off campus and provide better access to those locations you want to go!

Come help FGCU explore transportation strategies that can improve mobility on your campus! You can help the planning by providing information on transportation topics regarding:

- Public transportation – including route destinations and stop locations
- Bicycle and pedestrian improvements
- Areas of concern – traffic congestion, parking access/egress, etc.
